DETAILED ACTION

Election

Applicant's election without traverse of Group I, i.e. claims 1 - 28 and 72 in Paper No. 4 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 8, 9, 10, 12 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Hilton.

Hilton, U.S. Patent 5892,245, discloses a ball grid array package. As shown in Figure 2, the adaptor comprises an intermediate layer 34 formed by dielectric substrate 35 and elastomeric material-filled holes 36. Because this layer is formed by a combination of these two materials, the overall modulus of elasticity is different than the modulus of elasticity of the material filling the holes 36. The elastomer contains conductive particles such as silver, which create a conductive path through the layer 34. Column 2, beginning on line 62 describes the types of conductive particles which may be used.

Art Unit: 2822

Allowable Subject Matter

Claims 2 - 6, 11, 13-14 and 72 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 16 - 28 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

King et al., U.S. Patent 5,140,405 discloses a semiconductor assembly.
